

## **Road Safety Club Report: Government Degree College, Chail Koti, Session 2024-25**

Road safety is a crucial aspect of ensuring the well-being of every individual in our society. With an increasing number of vehicles on the road, the need for awareness regarding traffic rules and the importance of safe practices has never been more critical. Government Degree College Chail Koti, through its Road Safety Club, has taken active steps to address this issue by organizing a series of programs aimed at raising awareness among students and the local community. These activities include visits to law enforcement agencies, workshops on road safety measures, health camps, community outreach initiatives, and educational competitions. This report highlights the key activities organized by the Road Safety Club in the session 2024-25, such as a visit to the Adarsh Thana in Chhota Shimla, a one-day workshop on road safety, a medical health camp, distribution of traffic signal and traffic rules pamphlets, and various competitions like declamation, quizzes, chart-making, and slogan writing on road safety.

### **Purpose of the Road Safety Club**

The Road Safety Club at Government Degree College, Chail Koti, was formed with the aim of educating students and the surrounding community about road safety practices and traffic regulations. The club works to promote safe driving, pedestrian awareness, and responsible road usage through various outreach activities. Its efforts are directed toward reducing road accidents, encouraging safe practices among young people, and engaging the community in road safety education through participatory events and programs.

### **Activity 1: Visit to Adarsh Thana, Chhota Shimla. 03.03.2025**

One of the most important activities organized by the Road Safety Club was the visit to Adarsh Thana (Police Station) in Chhota Shimla. This visit offered students a firsthand experience of how law enforcement works to ensure road safety and the importance of traffic regulations in preventing accidents.

During the visit, students interacted with traffic police officers, who provided a detailed overview of traffic laws, regulations, and enforcement procedures. The officers explained various traffic signs and symbols, the importance of following speed limits, and the consequences of violating traffic rules, such as fines and penalties. The students also learned about the technologies used by law enforcement to monitor traffic, such as breathalysers, speed cameras, and radar guns.

Additionally, the students participated in a mock traffic enforcement session, where they learned how traffic violations are detected and handled by the police. This hands-on experience deepened the students' understanding of the importance of law enforcement in maintaining road safety.

### **Activity 2: One-Day Workshop on Road Safety Measures: 18.12.2024**

A crucial aspect of the Road Safety Club's initiatives was the organization of a one-day workshop on road safety. The workshop aimed to provide students with comprehensive knowledge about road safety measures, traffic regulations, and vehicle maintenance.

The workshop featured presentations by Mr Shakti Singh, DSP, Shimla. Topics discussed in the workshop included the importance of seat belts and helmets, the dangers of driving under the influence of alcohol, the significance of regular vehicle maintenance, and the impact of distractions such as mobile phones on driving behavior.

One of the major highlights of the workshop was a session on pedestrian safety, where students learned the

roads. The workshop also included a demonstration of how alcohol affects driving skills through simulators, reinforcing the message of never driving under the influence.

The day concluded with a discussion on how students could contribute to road safety initiatives in their local communities. Experts encouraged the students to engage in awareness campaigns, educate others about safe driving, and promote the importance of traffic rule adherence.

### **Activity 3: Medical Health Camp for Road Safety: 20.03.2025**

In addition to the educational activities, the Road Safety Club organized a medical health camp with a focus on road safety and accident prevention. The camp aimed to provide participants with essential information on the health risks associated with road accidents and the importance of maintaining good health to reduce accident-related injuries.

The camp featured free health check-ups, including blood pressure monitoring, vision tests, and general health assessments. Dr Ganga Sharma, Doctor from Rippon Hospital discussed the common injuries sustained in road accidents, such as head trauma, fractures, and spinal injuries, and offered advice on preventive measures to avoid these injuries.

One of the critical aspects of the health camp was a session on first aid. Participants were taught basic first aid techniques, such as how to perform CPR, stop bleeding, and stabilize an injured person before medical help arrives. The camp also emphasized the importance of wearing protective gear, such as helmets and seat belts, to minimize the risk of injury in case of an accident.

The health camp also provided valuable insights into the role of fitness in road safety. Experts discussed how regular physical activity and good health can improve reflexes and concentration, which are essential for safe driving.

### **Activity 4: Distribution of Traffic Signal and Traffic Rules Pamphlets: 19.12.2024**

As part of their outreach efforts, the Road Safety Club members distributed traffic signal and traffic rules pamphlets to local drivers, commuters, and pedestrians. The pamphlets contained vital information about traffic laws, common traffic signs, and the importance of adhering to road safety regulations.

The distribution took place in Koti Market including, bus stop and prominent intersections. Club members engaged with drivers, encouraging them to follow traffic rules such as wearing seat belts, observing speed limits, and refraining from using mobile phones while driving.

In addition to the pamphlets, the club also distributed small posters about pedestrian safety, reminding people to cross roads at designated crosswalks and be aware of their surroundings while walking. This initiative was an effective way to spread awareness about road safety to a wider audience and ensure that people in the community had access to the information needed to make safer choices on the roads.

### **Activity 5: Organizing Declamation, Quiz, Chart Making, and Slogan Writing Competitions: 04.12.2024**

To engage students creatively and make road safety awareness fun, the Road Safety Club organized a series of competitions within the college. These included declamation, quizzes, chart-making, and slogan writing competitions, all focused on promoting road safety.

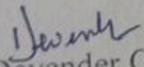

1. **Declamation Competition:** Students participated in a declamation competition where they presented speeches on various topics related to road safety, such as the importance of wearing helmets, the dangers

- of overspeeding, and the need for stricter traffic laws. The competition encouraged students to think critically about road safety and share their ideas on how to improve it.
2. Quiz Competition: A quiz competition tested students' knowledge of traffic rules, road signs, and safe driving practices. The quiz was designed to be both informative and engaging, with questions covering a wide range of topics, including the history of road safety, the significance of different traffic signs, and the consequences of traffic violations.
  3. Chart Making Competition: In the chart-making competition, students created colorful and informative charts that depicted road safety tips, traffic signs, and the importance of following traffic rules. The charts were displayed in the college premises, serving as constant reminders for students and visitors about the importance of road safety.
  4. Slogan Writing Competition: The slogan writing competition challenged students to come up with creative and impactful slogans to promote road safety. Some of the winning slogans included "Drive Safe, Stay Alive," "Be Alert, Don't Get Hurt," and "Your Life is Precious, Follow the Road Rules." These slogans were used in various awareness campaigns, helping to spread the message of road safety in a concise and memorable way.

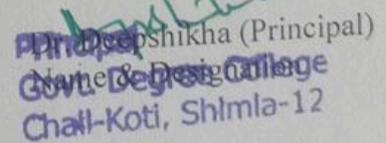

The activities organized by the Road Safety Club at Government Degree College, Chail Koti, have significantly contributed to raising awareness about road safety within the college and the local community. Through the visit to the Adarsh Thana, the one-day workshop on road safety, the medical health camp, the distribution of traffic pamphlets, and the various competitions, the club has actively engaged students and the community in discussions about the importance of following traffic rules and adopting safe practices on the roads.

By involving students in these diverse activities, the club has empowered them to become advocates for road safety and play an active role in spreading awareness. These initiatives are vital in creating a culture of responsible road usage, reducing the number of accidents, and making the roads safer for everyone. As the Road Safety Club continues its efforts, it is hoped that its activities will inspire a wider commitment to road safety and lead to lasting positive changes in both the college and the community.
