

**Anti-Rabies Awareness Program by Department of Animal Health & Breeding
HP Govt. in collaboration with IQAC of GDC Chail-Koti**

A comprehensive awareness program on "Behavior around Animals" was organized for students and staff at Government Degree College, Chail-Koti by department of Animal Health & Breeding HP Govt. Today. The program aimed to educate students and staff about safe behaviors to adopt when in contact with animals and how to prevent potential diseases. In his detailed presentation, the keynote speaker, Dr. Jaipal Basta, provided detailed information about the causes, symptoms, routes of infection, and preventive measures for the deadly disease rabies. He explained that timely vaccination, proper first aid for injuries, and a conscious attitude towards animals are the most effective ways to prevent this disease.

Dr. Basta's lecture was highly informative, scientifically grounded, and interactive. Students asked many inquisitive questions during and at the end of the session, to which he provided simple, clear, and satisfying answers. Students actively participated in the program, deepening their understanding of zoonotic diseases.

The entire college staff was present on this occasion and contributed to the successful conduct of the program. Finally, Prof. Devender Jhangta expressed his gratitude to the keynote speaker, Dr. Basta, and said that such awareness programs are extremely useful for students. He also thanked all present and the organizing team for the successful event.
